

Hybrid N is a new type of fertilizer. The unique thing about Hybrid N is that it contains both mineral fertilizers and organic matter, where by the name hybrid. Hybrid N is a complete fertilizer that contains all the plant nutrients.

Hybrid N is a complete fertilizer containing all the plant nutrients; NPK, magnesium, sulfur, calcium, micronutrients and hygienic organic matter. The mineral part of the nitrogen is Urea which is protected with Agrotain®. Development of Hybrid N started with the fertilizer Green 8K. The combination of mineral and organic fertilizers provides a product that preserves and enhances the unique properties of both types. A perfect combination.

Exclusive: Hybrid N is manufactured with Green Fertilizer's unique formulation. Our third element's binding properties in the composition enable Hybrid N's amazing properties.

Homogenized: The ingredients in Hybrid N are evenly mixed, ensuring equal content in each pellet. It provides even distribution of all nutrients.

Hygiene and composting: The raw materials are composted at high temperature over a long period of time. Ensures infectious fertilizer.

Pelleted: Hybrid N is pelleted in size 2-4 mm or dust-free crushed pellet sizes 1-2 mm. Easily maneuverable for immersion and eutrophication.

Soluble and renewable: Nutrients are readily available with a lasting effect. This gives the plants the necessary access to nutrients through growing season.

Value: We would argue that this is one of the most economical fertilizers available in the market. The fertilizer dissolves quickly.
